

LINJING RAO

New York, NY | 315-928-0328 | Linjing.rao@gmail.com | [LinkedIn](#) | [GitHub](#)

Transit data operations analyst at Citymapper (Via Transportation) a transit app serving millions daily across 120+ cities, operating in the same space as Apple Maps. Cornell Tech graduate with hands-on expertise in urban mobility data, GTFS pipelines, transit agency and advertising partnerships, and applied AI/ML.

EDUCATION

Cornell University – Cornell Tech, New York, NY

Aug 2022 – May 2024

Master of Applied Information Science and Information System | Urban Tech Concentration

GPA: 3.9 | Admitted with Merit Scholarship

Relevant Coursework: Machine Learning, Statistical Analysis, Data Visualization, Product Management, UI/UX

Syracuse University, Syracuse, NY

Aug 2017 – May 2022

Bachelor of Architecture

Minor in Economics | Graduated with Magna Cum Laude Honors

TECHNICAL SKILLS

Programming Languages: Python, SQL, YAML, C#

Analytics & Operations: Operational metrics, KPI definition, trend analysis, A/B testing, statistical analysis, competitive benchmarking, user behavior analysis

Tools & Platforms: Zendesk, PagerDuty, JIRA, Airtable, Grafana, AWS (S3, Athena, IAM), Git/GitHub, Jenkins CI/CD, API integration (GTFS, GTFS-RT), ArcGIS, Streamlit

EXPERIENCE

Via – Citymapper, Data Analyst, New York, NY

Oct 2024 – Present

- Triaged 2,500+ user-reported escalations via Zendesk, Airtable, and PagerDuty; surfaced 248 high-priority issues that directly shaped Product and Engineering quarterly priorities while maintaining same-day SLA for consistent service delivery.
- Owned the NYC Citymapper App Data operations, managing 10-15+ vendor data feeds across daily pipeline builds and weekly production deployments, ensuring geospatial routing accuracy for 8M+ residents.
- Served as primary operational liaison for vendor partners across 7 geographic areas (Americas, UK/EMEA, APAC); coordinated project management and go-live execution for 50+ regional launches, presenting operational health updates to cross-functional leadership.
- Reduced manual QA overhead by 75% by identifying automation opportunities and developing a Python comparison tool; authored dashboard specifications now monitoring operational health across 120+ production regions.
- Authored deployment guide standardizing in app advertisement integration request handling, enabling consistent multi timezone service delivery across teams in NYC, London, and APAC.
- Led the 2026 US Region Improvement Plan across 5 metropolitan regions: synthesized data quality assessments and competitive benchmarking into a prioritized program adopted by Product and Engineering for OKR planning, improving user experience and customer satisfaction.

Urban Tech Hub, Data Researcher, New York, NY

Sep 2022 – Aug 2023

Multifamily Rezoning Visualization Project

- Led problem definition and metric framing for a 0→1 product initiative, developing hypotheses and MVP success criteria through user interviews and survey-based analysis.
- Analyzed and visualized large-scale geospatial and demographic datasets (zoning layers, population, census indicators) using ArcGIS and Python; translated complex spatial data into actionable insights for cross-functional stakeholders.

Cornell Tech, Teaching Assistant – INFO5410 Urban System

Fall 2023

- Designed and taught urban data curriculum to 40+ master's students; led weekly workshops on ArcGIS and Python spatial analysis using live NYC Open Data.
